

The Birthright and Assignment of Abundance

heirscovenant.com

As Kingdom citizens we must have faith in God's economy, know the principles that govern His economic system, and operate in them to see the expected and promised results (just must live by faith).

God's system is higher than the natural system.
The only way a natural system can operate at the
level of the Kingdom is when Kingdom
ambassador's execute God's system in a particular
sphere of influence, creating on Earth as it is in
Heaven

Poverty Mindset (spirit of lack): shows up as: not having enough, having just enough, having enough but fear of losing, having to hold on as if won't get more

The Poverty mindset impacts how people see their purposes and destiny; how they see themselves in light of their purposes and destiny

Poverty is not humility, living in abundance is not excess, money is not evil, it's not greedy to have a lot of money.

The covenant of God is a covenant of
Blessing, that produces blessings. We must
lay hold to the promise and covenant benefit
of abundance with aggression not
desperation

How can a person believe for prosperity if
their present situation looks differently than
what God has said?

Renew your mind, infill your mind as well as your soul with what God has said about prosperity. It's important that you make it personal because it is God's word speaking to you

Align your words with what Holy Spirit is revealing to you. You must also guard that revelation and not allow anyone to talk you out of it, convince you differently, or educate you to a lower level of thinking.

Position yourself to learn from people who are operating financially at the level that you are called to operate on.

Be sensitive to weed out the things that are not of God or simply do not apply to you. Allow Holy Spirit to help you to discern what is what. You may be challenged in your thinking

Realize that your present situation is not
your destination.

Respond in faith to what God says to you
and the strategies he gives you regarding
finances.
